

NORDIMPIANTI

About Us

NORDIMPIANTI is one of the world's leading manufacturers of production lines and machines for the production of prestressed concrete elements:

- *Hollow core slabs*
- *T-beams*
- *Half slabs*
- *Solid slabs*
- *Others*

Founded in **1974** as a small family business

Active in more than **50** countries

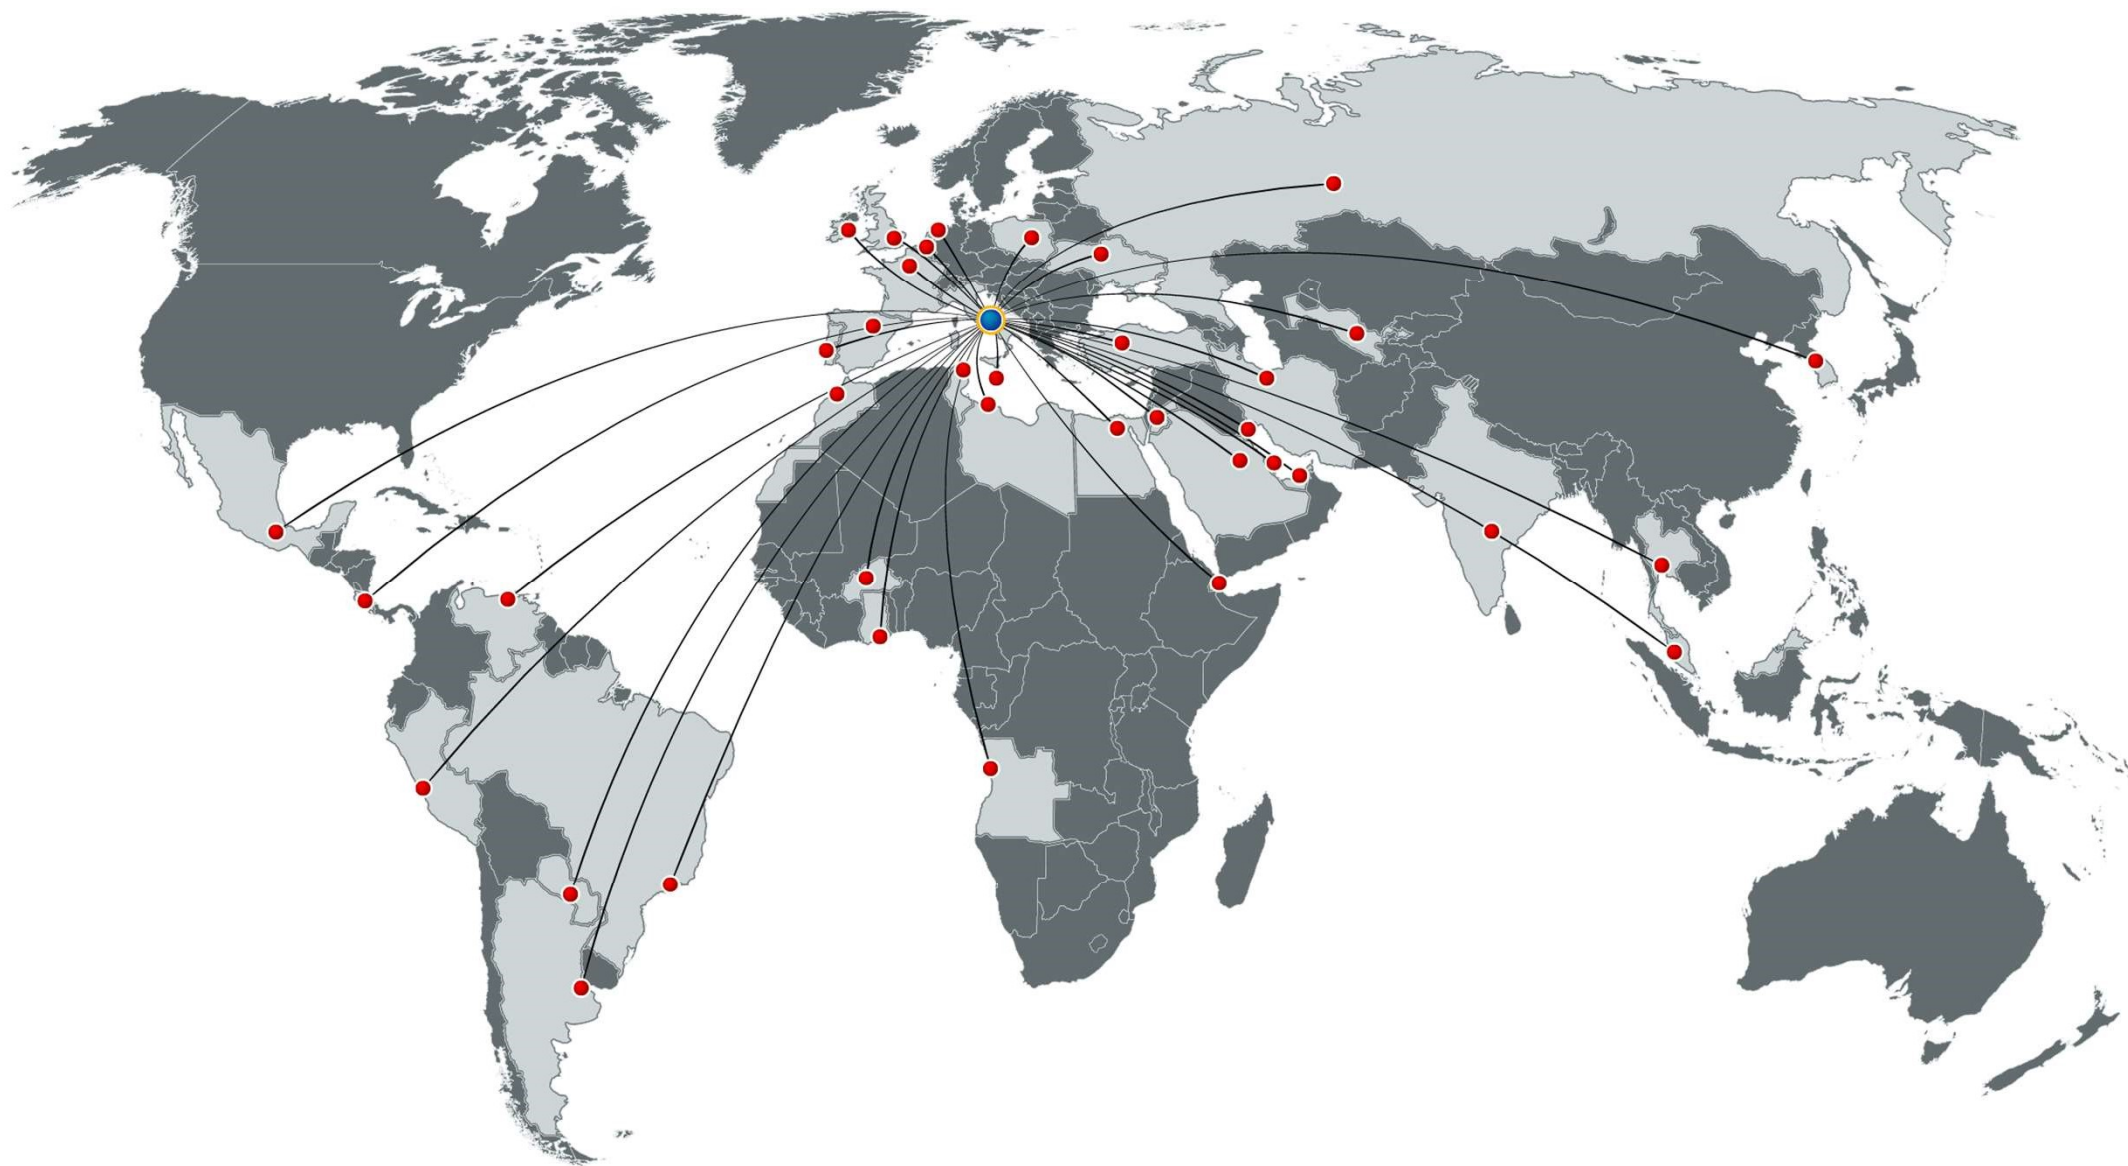

Over a **hundred** plants delivered

More than a **thousand** of Nordimpianti's machines are in operation around the world

16 Representative offices covering over **37** countries around the world

1. Quality of the finished product
2. NORDIMPIANTI is a family owned company
3. Company flexibility
4. Reliability and build quality of the machines
5. Low maintenance costs of the machines
6. Professional service, both pre-sales and after-sales
7. We offer the widest range of prestressed concrete elements production
8. We are the only company that can offer all three types of casting machines, Extruder, Slipformer and Wet Casting
9. We are the only company that can supply Slipformer machines for prestressed concrete elements up to 1 m high
10. All processes are carried out within the company

- **1974** The company started as a producer of Slipformer machinery
- **1987** NI develop the 1st Slipformer for large hollow core slabs up to 700 mm high
- **1996** saw the implementation of the 1st circulation line concept applied for the production of inverted T-beams. Total factory capacity 27 000 m/day
- **1995** to meet market demands NI launched the new Extruder casting machine for the production of hollow core slabs up to 500 mm high
- **2000** NI improved performance of Slipformer machines for the production of large hollow core slabs up to 1000mm high where high loading capabilities and spans up to 25 m are required
- **2004** the range of Extruders was extended to include a series of machines able to produce hollow core slabs 2.4 m wide (or 2x1.2m wide) and heights up to 500 mm
- **2005** saw the implementation of the 2nd circulation line concept applied for the production of hollow core slabs for a well known UK company. Total factory capacity 3600 sqm/day
- **2008** NI launched the 1st Extruder in the world capable of producing hollow core slabs of 1500 mm wide for the **Russian** and **CIS** countries
- **2009** the range of Extruders was extended to include a series of machines able to produce hollow core slabs 2x600 mm wide and heights up to 200 mm for the housing market
- **2010** NI launched the new EVO Extruder machine at Bauma show in Munich, Germany
- **2012** the range of Extruders was extended to include a series of machines able to produce hollow core slabs 1250 mm wide and heights up to 500 mm for the **Brazilian** market
- **2013** NI launched the new SF Wet Casting machine

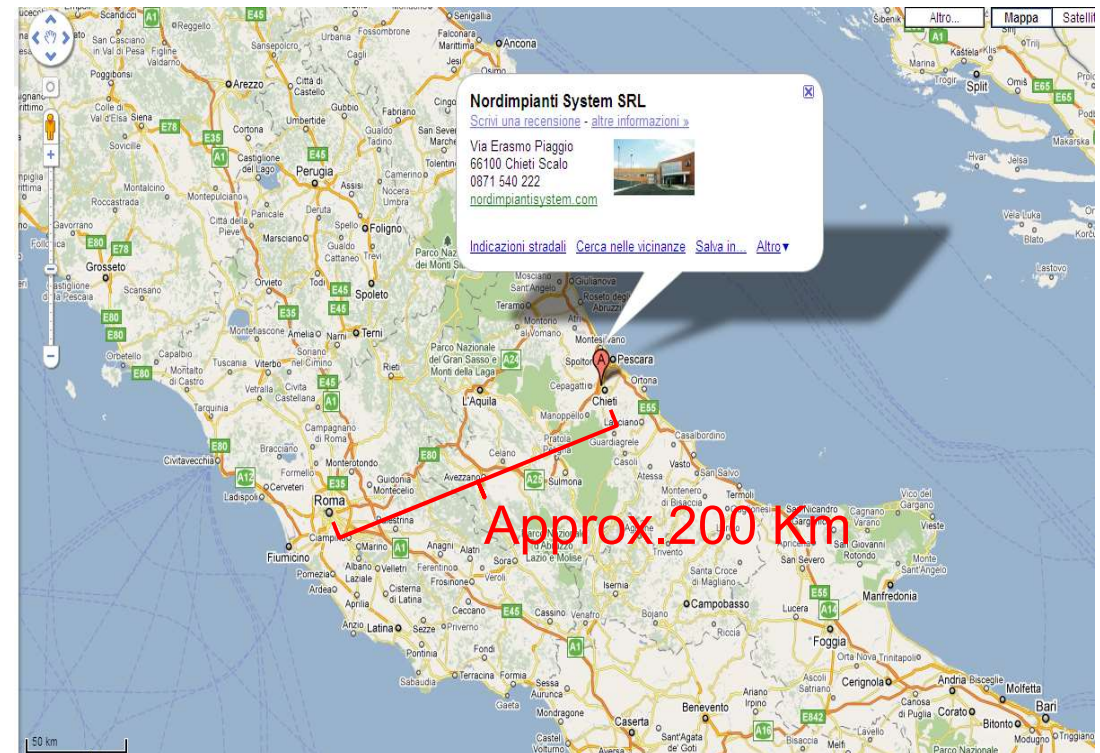

Our aim is to provide our customers with the best quality products and services to help them reach their potential and be successful within their own marketplace.

To achieve this we use a highly professional motivated team of people combined with high-end technology equipment and machinery.

We think it is important to forge strong and lasting relationships with our customers in order to understand their business and to be in a better position to respond to their needs.

NORDIMPIANTI is based in Chieti, in the central region of Abruzzo.

It has an excellent motorway connection to the International Airport Hubs in Rome making the company easily accessible from all parts of the world.

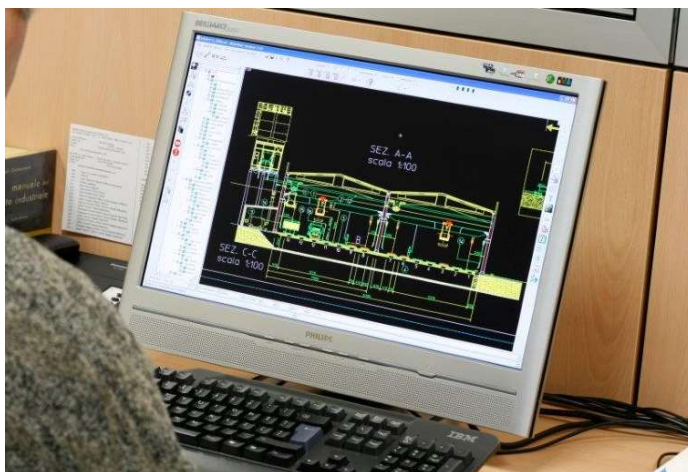

... from beginning ...

- ✓ Project survey and data acquisition
- ✓ Factory design and layout drawings

- ✓ Factory design and layout drawings
- ✓ Support during site & building construction

✓ Plant installation

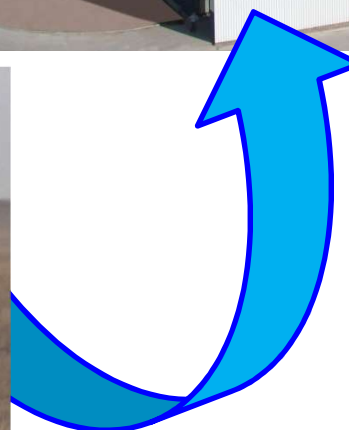

✓ Production start up and personal training

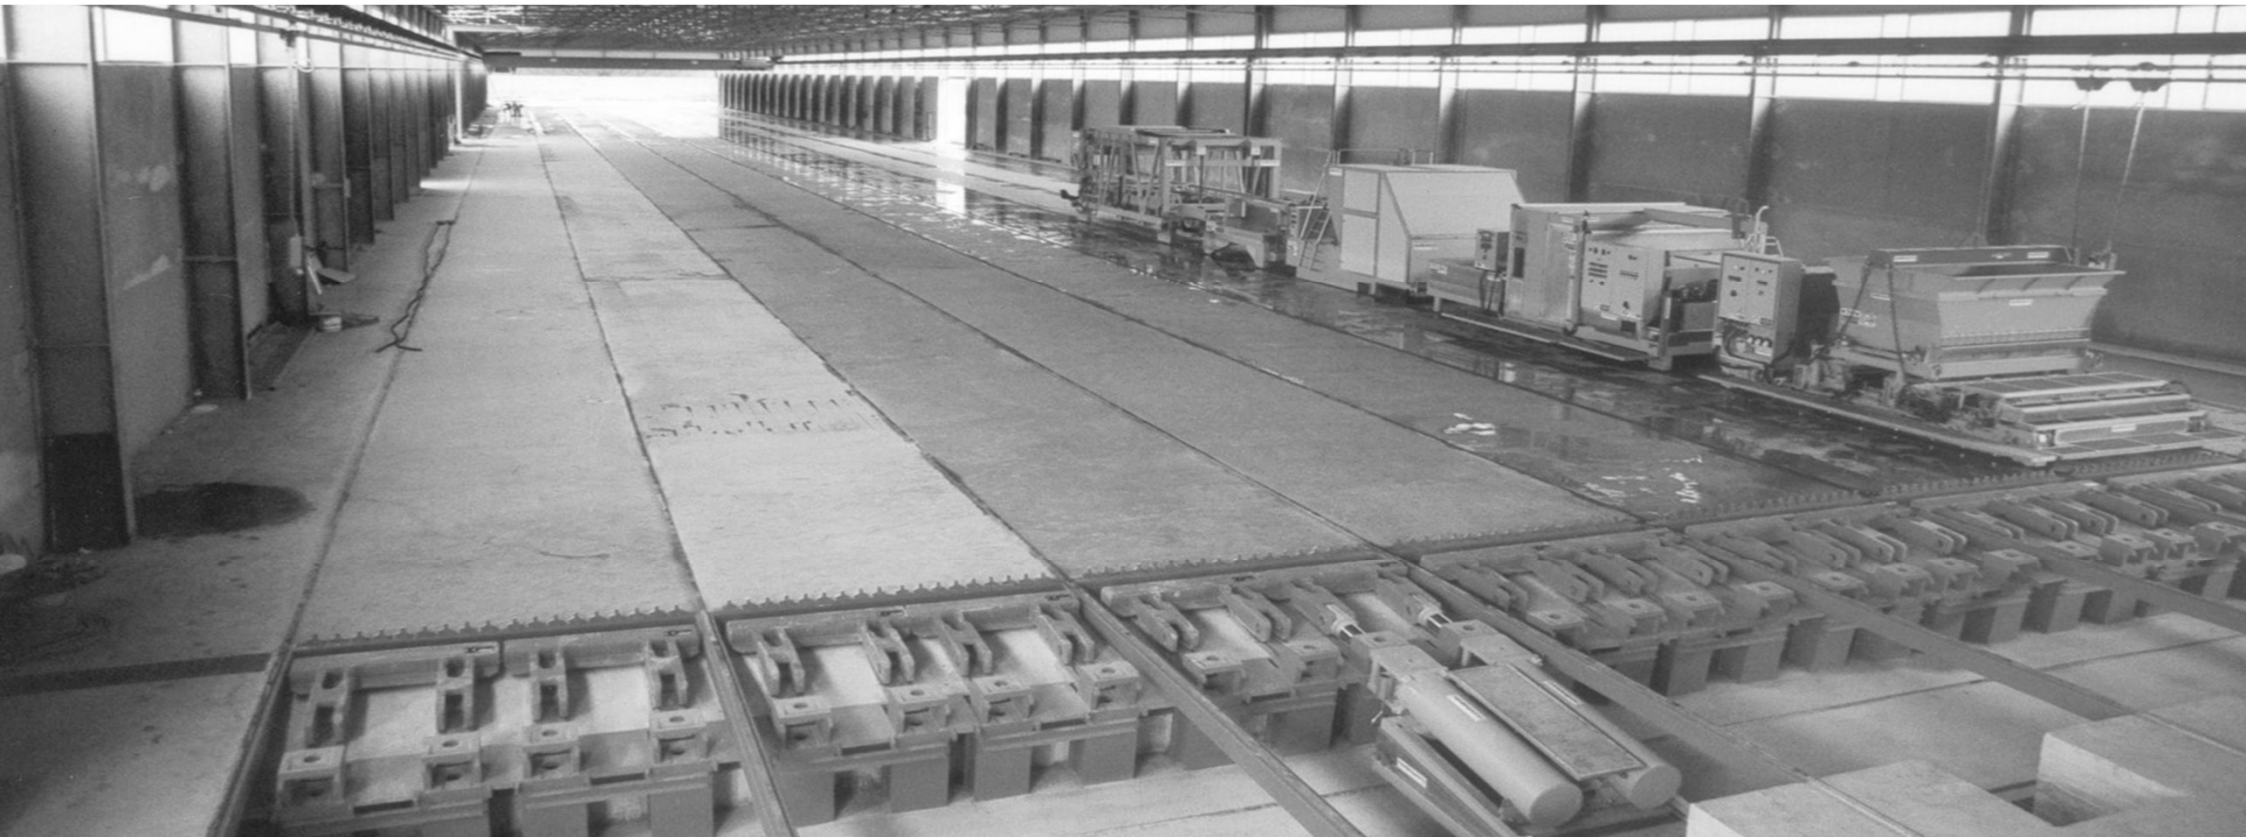

- ✓ Extensive after sales support service
 - ✓ Spare parts support

In short...

...from beginning to end

Full range of machinery and equipment for prestressed concrete element production

The best casting machinery available

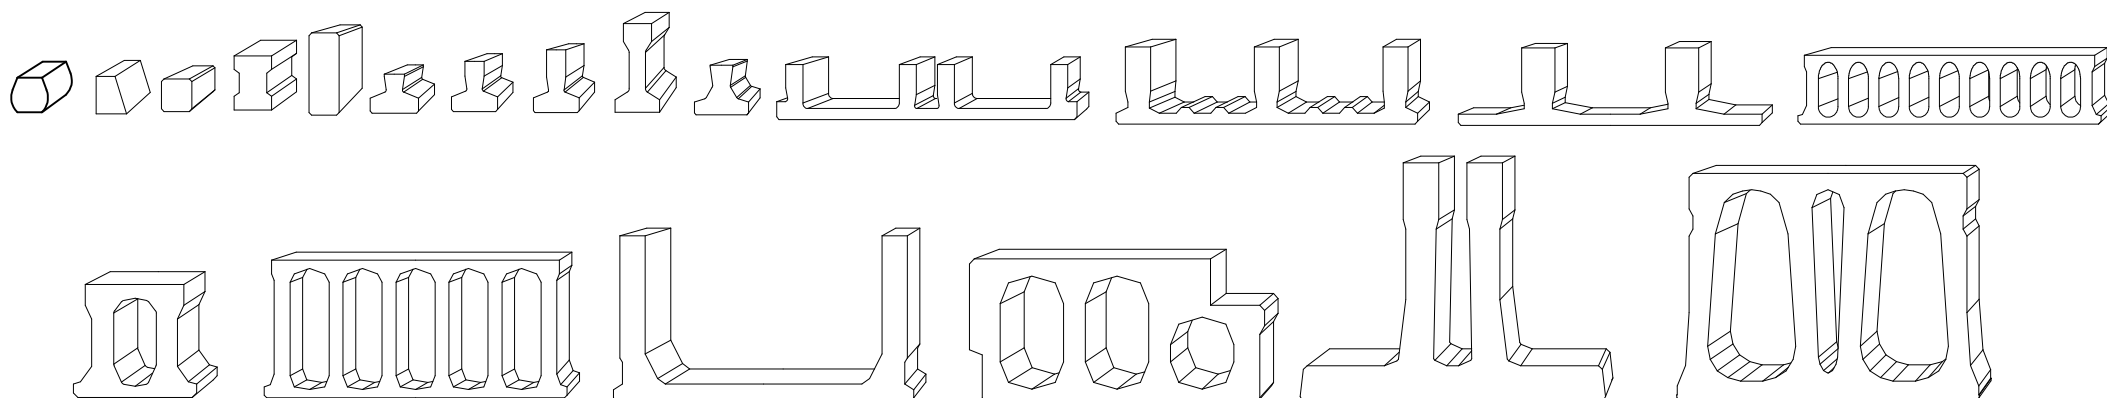

Slipformer SF

Extruder EVO

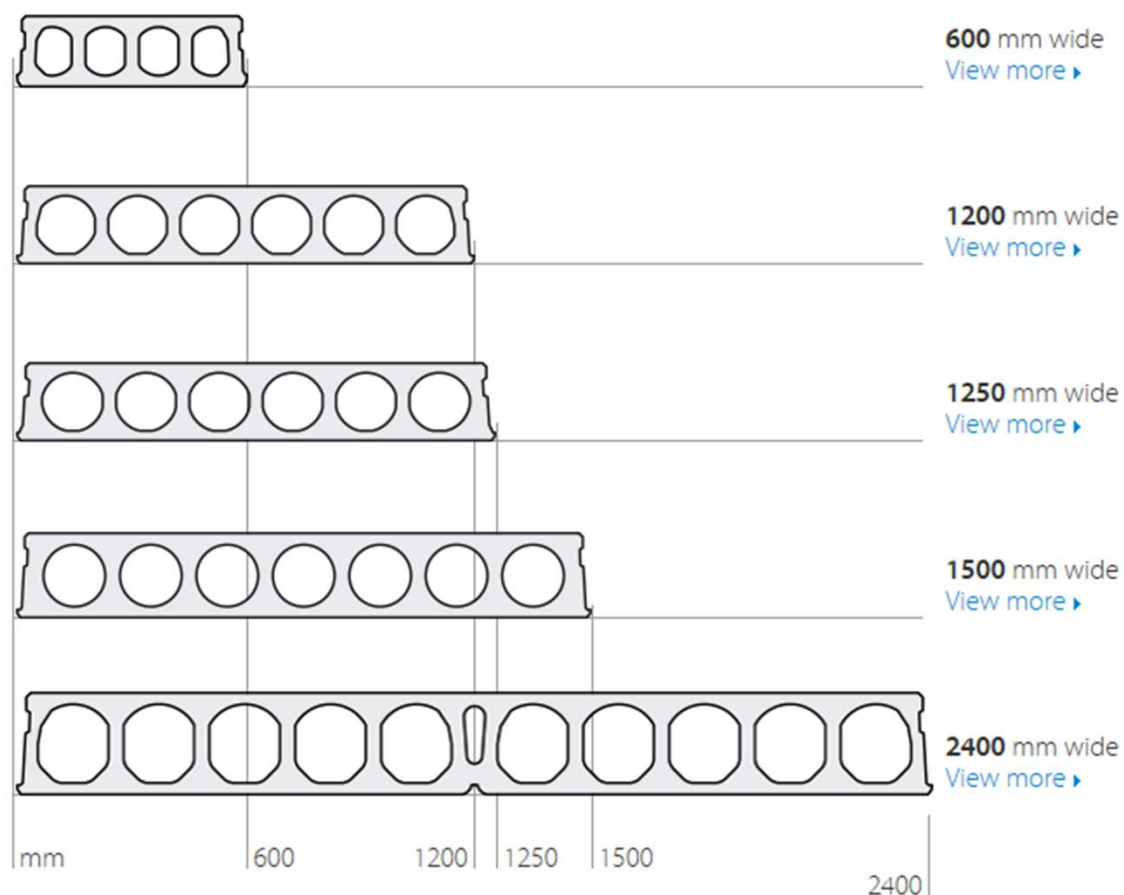

Wet casting WF

Extruder machines

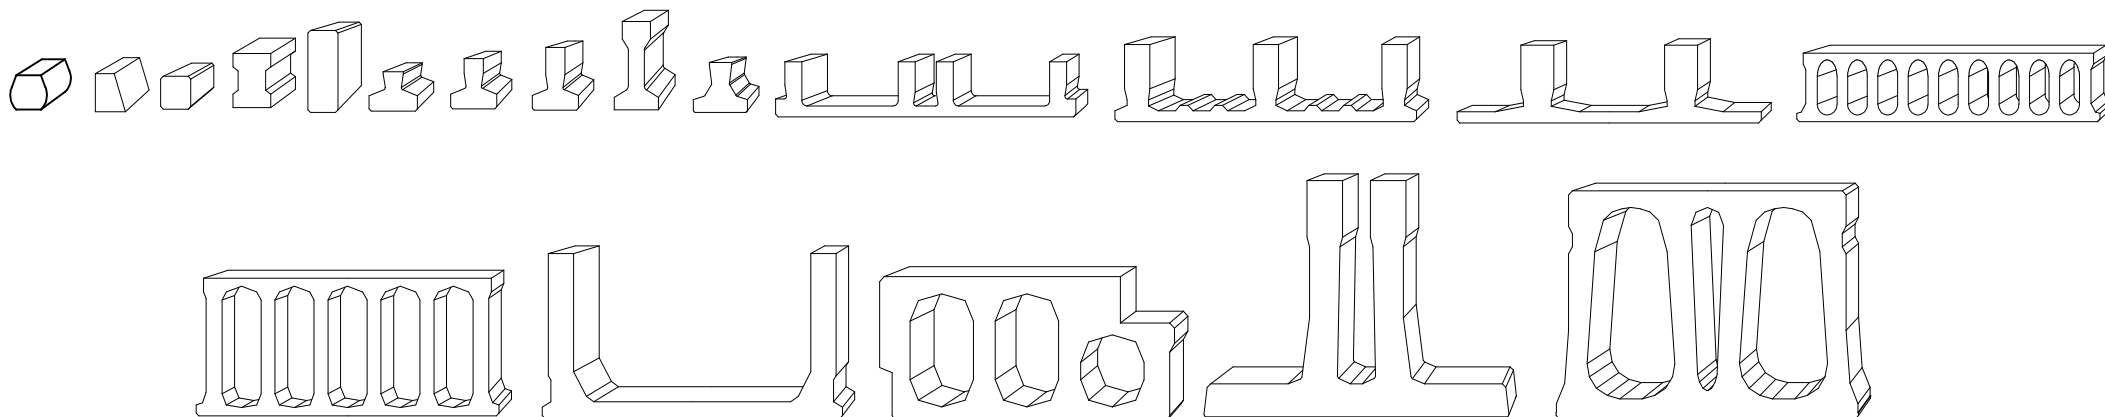

The standard thickness varies from 150 mm up to 520 mm and in widths of 600 mm, 1200 mm, 1250 mm, 1500 mm and 2400 mm

Slipform machines

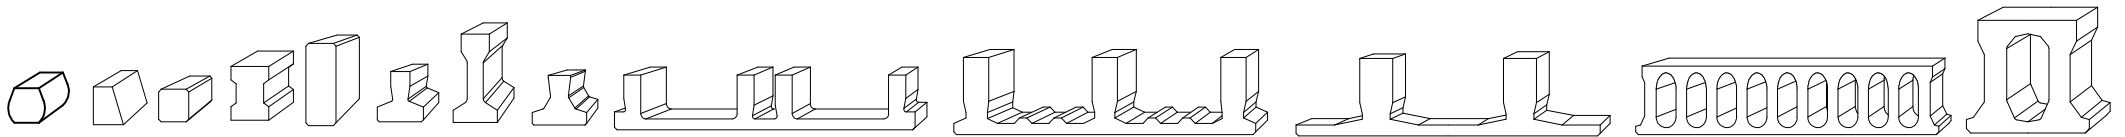

- T-beams
- Vineyard posts
- Lintels
- Hollow core slabs
- Solid slabs
- Double “T” slabs and beams
- U Panels
- Foundation Piles

Wet casting machines

- T-beams
- Vineyard posts
- Lintels
- Hollow core slabs
- Single hole beams
- Solid slabs
- Double “T” slabs
- U Panels
- Foundation Piles

Ancillary equipment

MULTI-ANGULAR SAWS

CROSS-CUTTING SAWS

LIFTING BEAMS

LIFTING MACHINES
